**Allied Technology Announces the Acquisition of the EDGE™  
Desalination and Dehydration Product Lines from Cameron**

HOUSTON – January 19, 2010

Allied Technology has completed the acquisition of the EDGE™ Desalination and Dehydration product lines from Cameron. With over 500 installations in oil refineries worldwide, the EDGE™ product is the number two leading provider of this type of specialized process equipment.

Wendell Brooks, President and CEO of Allied Technology said, “The EDGE™ product line acquisition complements our current product and service offerings that serve the downstream refinery markets. Refiners are facing an ever changing slate of crude oil mix and therefore continued development and enhancement of desalination and dehydration equipment will be required to support these issues. We are committed to the continued product and technology development to remain a leader in the desalination and dehydration markets.”

In addition to the EDGE™ product line acquisition, Allied Technology also acquired a non-exclusive license to manufacture and sell Cameron’s Dual Frequency technology for use in desalination applications.

The EDGE™ and Dual Frequency technologies will be manufactured and sold by Allied Technology’s Certified Technical Services division based in Pasadena, Texas. Mike Delamore, Executive Vice President of Certified Technical Services, said, “We are excited about the addition of the EDGE™ and Dual Frequency technology to our product offerings and look forward to continuing the development of these products. We believe that the EDGE™ and Dual Frequency technologies will continue to provide the most reliable and flexible solutions for electrical desalination and dehydration applications.”

**About Allied Technology**

Based in Houston, TX, Allied Technology provides engineered process systems and field services from the well head to inside the refinery fence. Allied Technology services the upstream, midstream and downstream segments in oil and gas production equipment and services. Our broad range of products and geographical locations positions Allied Technology as a process systems specialist to the Oil and Gas service industry. For additional information, visit our Allied Technology website at [www.alliedtechnology.com](http://www.alliedtechnology.com).

Certified Technical Services, L.P., a wholly owned subsidiary of Allied Technology, is a leading industrial general contractor with state-of-the-art manufacturing facilities in Pasadena, Texas, where Certified fabricates process components for plants and engineered packaged systems for field installation. For more information on Certified, please visit their website at [www.certifiedway.com](http://www.certifiedway.com).
